

Uzair Ali

Full Stack Developer · MERN · Computer Science
uzaairaamir@gmail.com | 0300-1234567 | Hasan Abdal, Attock

Full Stack MERN Developer with 2+ years of hands-on experience building secure, production-ready web applications. Deep knowledge of React, Node.js, Express, and MongoDB. Passionate about frontend security, UI/UX, and mentoring junior developers. Proven ability to deliver end-to-end solutions from authentication systems to API testing platforms.

EXPERIENCE

Frontend Developer 2023 – Present

Independent Contractor · Online

- Developed deep understanding of UI/UX principles and mentored multiple junior developers in modern frontend practices.
- Gained extensive experience handling backend requests and implementing frontend security measures.
- Transitioned from vanilla JavaScript to React.js, building reusable component libraries and optimizing application performance.

Backend Developer 2024 – Present

Independent Contractor · Online

- Built robust Express.js APIs with deep understanding of routing, data handling, and HTTP status codes.
- Deployed applications on Vercel and implemented backend security best practices including cookie management and authentication.
- Developed production-ready Node.js and Express projects with focus on security, rate limiting, and secure session handling.

PROJECTS

NexAuth — Auth System MERN Full Stack

MERN stack authentication system with secure login/signup flow, HTTP-only cookies, JWT, rate limiting, bcrypt hashing, and MongoDB Atlas integration. Deployed and production-ready.

[github.com/npm-335i/Auth-System-MERN](#) · [Live Demo](#)

API Tester v2.0 Full Stack

Full-stack API testing tool built with React and Node.js. Supports public and private API keys, custom headers, request bodies, response inspection, status codes, and timing. Fully responsive across devices.
